

Uploading SQL Database to MySQL Server

1. Setup a new connection:

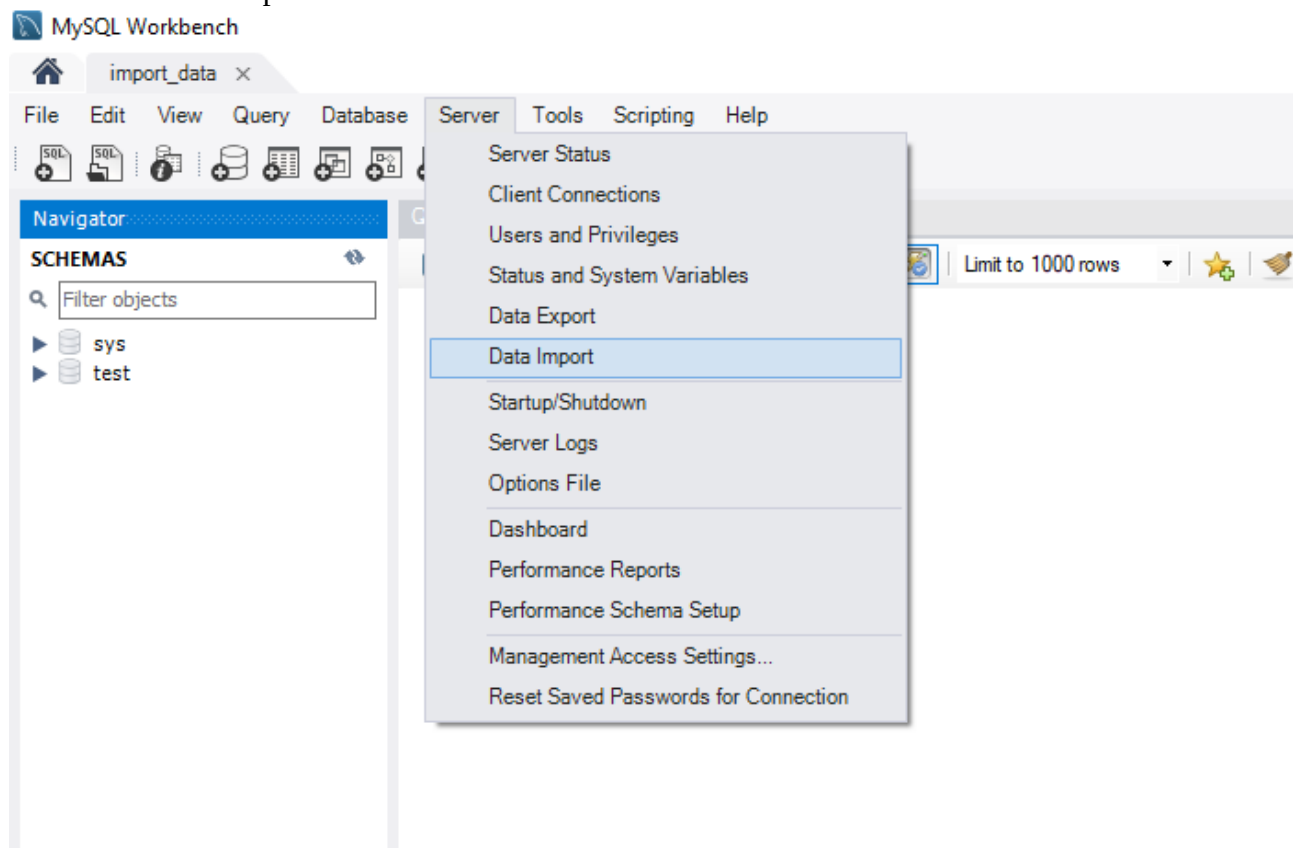

The 'Setup New Connection' dialog box is shown with the following fields and options:

- Connection Name:** import_data (with a hint: 'Type a name for the connection')
- Connection Method:** Standard (TCP/IP) (with a hint: 'Method to use to connect to the RDBMS')
- Parameters tab:**
 - Hostname:** 127.0.0.1 (with a hint: 'Name or IP address of the server host - and TCP/IP port.')
 - Port:** 3306
 - Username:** root (with a hint: 'Name of the user to connect with.')
 - Password:** (with buttons 'Store in Vault ...' and 'Clear'; hint: 'The user's password. Will be requested later if it's not set.')
 - Default Schema:** (with a hint: 'The schema to use as default schema. Leave blank to select it later.')

Buttons at the bottom: 'Configure Server Management...', 'Test Connection', 'Cancel', and 'OK'.

2. Server > Data Import

3.

- Choose “Import from Self-Contained File” and select the folder which contains the file from github
- Create new Default target Schema: “mlp”
- Select Dump Structure and Data
- Start Import

4. Verify if table has been successfully imported

The screenshot shows a database management tool interface. On the left, the 'SCHEMAS' pane displays a tree view with 'mlp' expanded, showing 'Tables' and 'dta'. Below this, 'sys' and 'test' are also listed. The main query editor at the top contains the SQL statement: `SELECT * FROM mlp.dta;`. The 'Result Grid' at the bottom displays the data from the 'dta' table, with columns: price, address, description, rooms, size, and latitude. The data is presented in a table format with alternating row colors. On the right side of the interface, there are buttons for 'Form Editor', 'Field Types', 'Query Stats', and 'Execution Plan'.

price	address	description	rooms	size	latitude
